

Instrumentation Technologist

Full-Time Indeterminate Position
Integration Group

About Us

SNOLAB is an international facility for world-class underground physics research and has an expanding programme in astroparticle physics and underground science. Located in an air-conditioned clean room 2 km underground in the Vale Creighton Mine near Sudbury Ontario, with a suite of surface facilities and laboratories, SNOLAB is currently preparing for the next generation of experiments focusing on neutrino studies and the search for galactic dark matter.

The Position

As a certified tradesperson you will need to be able to, design, fabricate, construct, install, maintain, troubleshoot, calibrate, adjust, and repair specified industrial systems according to appropriate codes and regulations. Ensure equipment or system serviced is in good operating condition. Ensure servicing and installation is appropriately documented with controlled drawings and service records and in compliance with codes and regulations. Support and assist in design aspects of scientific program.

The job duties include but are not limited to the following:

- Read blueprints, diagrams, manuals and schematic drawings to determine work procedures.
- Install, align, dismantle and move control and measurement instruments on new and existing industrial systems according to layout plans.
- Program communication systems, troubleshoot and repair, maintain, calibrate, adjust and install instrumentation, electrical or mechanical systems according to technical manuals and written instructions in field settings.
- Assist in the design, recommending, selecting, developing, programming, installing, commissioning, and testing of electrical, instrumentation and control systems components, equipment and systems.
- Consult manufacturer's manuals, circuit diagrams and blueprints to determine tests and maintenance procedures for instruments used in experimental systems or infrastructure.
- Adhere to stated policies and procedures relating to health and safety, quality management and quality assurance

📍 Creighton Mine #9, 1039 Regional Road 24, Lively, ON P3Y1N2

📞 705.692.7000 🖱️ www.snolab.ca

- Experience sourcing and procuring instrumentation and control equipment and assets.
- Experience conducting preventive maintenance programs and keeping maintenance records is an asset

Criteria

Education:

- Candidates should hold a current Ontario Certification 447A or equivalent – Instrumentation & Control Technician

Experience:

- Knowledge of safe working techniques and practices.
- Knowledge of industrial systems to provide support with services in the areas of design, development, installation, testing, calibration, and operation.
- Effective oral and written communication skills.
- Must have the ability to calibrate electrical or electronic equipment and instruments according to technical manuals.
- Ability to troubleshoot and repair instrumentation, electrical or mechanical systems.
- Ability to work independently.
- Ability to understand and follow written instructions.
- Teamwork and Computer Skills.
- Experience with Siemens PLC Logic or Delta systems would be considered an asset

Salary Range

\$75,017 - \$81,000

Salary will be determined by qualifications and experience and includes an attractive benefits package. Relocation assistance will be determined in accordance with SNOLAB policies. This position is covered by the Collective Agreement between the SNOLAB Institute and the United Steelworkers Local 2020. To meet operational needs, shift work may be required.
