

Mechanical Tradesperson (Machinist)

Full-Time Indeterminate

Technical Services Group – Operations Division

About Us

SNOLAB is an international facility for world-class underground physics research and has an expanding program in Astro particle physics and underground science. "SNOLAB is located in a temperature-controlled clean room 2 km underground in the Vale Creighton Mine near Sudbury, Ontario. Additionally, the site features surface facilities and more clean room laboratories. SNOLAB is currently preparing for the next generation of experiments focusing on neutrino studies and the search for galactic dark matter.

The Position

As a certified Machinist at SNOLAB, you will bring your high level of experience to lead operations in our machine shops located both on the surface and underground. This pivotal role involves leveraging your extensive technical expertise in the design, fabrication, and maintenance of precision components essential for our stationary industrial machinery, cryogenic systems, and experimental setups. Your responsibilities will include overseeing the operation of advanced machining tools, ensuring adherence to exacting specifications and safety codes, and mentoring junior machinists.

We are seeking an individual who takes pride in their workmanship, exhibits a proactive approach to innovation, and continuously seeks to refine their machining skills. Your ability to effectively manage both machine shops and address complex challenges will be key to advancing our unique experimental projects.

📍 Creighton Mine #9, 1039 Regional Road 24, Lively, ON P3Y1N2
☎ 705.692.7000 🌐 www.snolab.ca

The Job Duties include but are not limited to:

- Read blueprints, diagrams, manuals, and schematic drawings to determine work procedures.
- Install, align, dismantle, and move industrial machinery and mechanical equipment, such as laboratory equipment, vacuum, hydraulic and pneumatic systems, etc. according to layout plans.
- Operate hoisting and lifting devices such as overhead and portable cranes, forklifts, and jacks to position machinery and parts during the installation, set-up, and repair of machinery.
- Inspect/examine machinery and equipment to investigate irregularities or malfunctions and provide diagnostic reports.
- Operate machine tools such as lathes, milling machines, drill presses, band saws and grinders to fabricate new parts required for experiments, overhauls, and set-up of machinery.
- Assist experimental program through the construction, installation and commissioning of experimental components, process systems and support structures.
- Generation of required work documentation whether for quoting, purchase order input, fabrication drawing, or completing workplans/test records and as-builts will also be required.

Education:

Grade 12 diploma and an Ontario certification in a relevant trade is required.

Experience:

- Experience as a certified tradesperson in the Machinist or Millwright trades.
- Experience working as a certified tradesperson in a machine shop.
- Experience in the following considered an asset: pipe fitting, machining, installing and/or operating machinery or equipment, hoisting, and rigging operations, and working at heights.
- Experience with working at heights is considered an asset.

Salary Range

Salary will be determined by qualifications and experience and includes an attractive benefits package. Relocation assistance will be determined in accordance with SNOLAB policies.
